

## Driving Forward Warehouse Operations

Warehouse Operatives work in a variety of environments and perform diverse roles.

They need to safely use a wide range of equipment, machinery and vehicles and effectively communicate with a variety of people and customers, being able to work under pressure to tight deadlines.

The **Supply Chain Warehouse Operative** level 2 apprenticeship qualification will provide your warehouse team with a thorough understanding of the key skills and abilities they need to drive forward your warehouse operations.

It will help them promote your objectives and brand, and see the importance of your reputation and what can affect it; and how their own performance can contribute to organisational success.

### Some of the key areas covered by this program:

- Safe driving/operating techniques
- Safe working at heights practices
- Safe use of equipment & machinery
- Minimising impact on environment
- Use of warehouse systems & processes
- Selecting/preparing & using packaging materials
- IT applications & relevant technology applications
- Effective communication with customers
- Delivering excellent customer service
- Working effectively in a warehouse team
